

ONE-PAGE REFERENCE

How InbXr works in one page.

Your list broadcasts **7 signals** about your next campaign. We built **10 tools** to read them — before the next send, not 6 weeks after your reply rate dies.

SIGNAL ENGINE

The 7 Inbox Signals

- 1 Bounce Exposure 25pts**
% of your list about to bounce in 30-60 days.
- 2 Engagement Trajectory 25pts**
Real-human opens after Apple MPP fakes are stripped.
- 3 Acquisition Quality 15pts**
How cohorts behaved on day one — warm or scraped?
- 4 Domain Reputation 15pts**
Both your sending rep and your recipient mix.
- 5 Spam Trap Exposure 10pts**
Probability of traps, scored before you send.
- 6 Authentication Standing 5pts**
SPF/DKIM/DMARC compliance with 2024-25 mandates.
- 7 Decay Velocity 5pts**
How fast your list is changing, and which direction.

TOOLKIT

The 10 InbXr Tools

- 1 Email Test**
Real send to seed mailboxes — full header report.
- 2 Sender Check**
A-F grade on DNS auth + 62 blocklists.
- 3 Inbox Placement**
Primary / Promotions / Spam across Gmail, Yahoo, Outlook.
- 4 Subject Scorer**
A/B test up to 10 lines across 7 dimensions.
- 5 BIMl Checker**
Logo + VMC cert + DMARC chain validation.
- 6 Header Analyzer**
Raw email headers translated to plain English.
- 7 Blacklist Monitor**
110+ blocklists watched 24/7 with alerts.
- 8 Email Verifier**
Syntax, MX, disposable, SMTP — one address.

- 9

Warm-up Tracker
Daily volume log + safe-ramp thresholds.
- 10

Framework Lab
16 copy frameworks + AI rewrites in your tone.

The cross-reference

Which tool reads which Signal. Which tool serves which Pillar. One row per tool.

☒ Primary — the main answer ☐ Secondary — supports / contributes

TOOL	S1	S2	S3	S4	S5	S6	S7
Email Test Real send + header report		☐		☐		☒	
Sender Check DNS auth + 62 blocklists				☒		☒	
Inbox Placement Primary / Promos / Spam		☒		☐		☐	
Subject Scorer Copy Intelligence							
BIMI Checker Logo + VMC + DMARC chain						☐	
Header Analyzer Raw headers decoded				☐		☒	
Blacklist Monitor 24/7 watchdog				☒			☐
Email Verifier Single-address validation	☒				☐		

TOOL	S1	S2	S3	S4	S5	S6	S7
Warm-up Tracker Daily volume log				○		○	
Framework Lab Copy Intelligence							

Note: Signal 3 (Acquisition Quality) and Signal 7 (Decay Velocity) are read by the **Signal Engine itself** on your uploaded CSV or connected ESP — not by any standalone tool. That's the deliberate boundary between the free toolkit and Pro automation.

By Signal — which tools read it

S1 Bounce Exposure	Email Verifier
S2 Engagement Trajectory	Inbox Placement (+ Email Test)
S3 Acquisition Quality	Signal Engine only — Pro/Agency
S4 Domain Reputation	Sender Check · Blacklist Monitor (+ Header Analyzer, Warm-up, Placement)
S5 Spam Trap Exposure	Email Verifier (disposable + dormancy)
S6 Auth Standing	Sender Check · Header Analyzer · Email Test (+ BIMl, Warm-up)

**S7 Decay
Velocity**

Blacklist Monitor (over time) — primary read is the Signal Engine

See what's about to break. Before the send.

The 10 tools read the surface. The Signal Engine reads all 7. The Pillars rescue what's already broken. Start with your Signal Score — free, no signup.
