

ONE-PAGE REFERENCE

How InbXr works in one page.

Your list broadcasts **7 signals** about your next campaign. We built **10 tools** to read them and **6 rescue pillars** to fix what's broken — before the next send, not 6 weeks after your reply rate dies.

 Download as PDF

SIGNAL ENGINE

The 7 Inbox Signals

- 1 Bounce Exposure 25pts**
% of your list about to bounce in 30-60 days.
- 2 Engagement Trajectory 25pts**
Real-human opens after Apple MPP fakes are stripped.
- 3 Acquisition Quality 15pts**
How cohorts behaved on day one — warm or scraped?
- 4 Domain Reputation 15pts**
Both your sending rep and your recipient mix.
- 5 Spam Trap Exposure 10pts**
Probability of traps, scored before you send.
- 6 Authentication Standing 5pts**
SPF/DKIM/DMARC compliance with 2024-25 mandates.
- 7 Decay Velocity 5pts**
How fast your list is changing, and which direction.

TOOLKIT

The 10 InbXr Tools

- 1 **Email Test**
Real send to seed mailboxes — full header report.
- 2 **Sender Check**
A-F grade on DNS auth + 62 blocklists.
- 3 **Inbox Placement**
Primary / Promotions / Spam across Gmail, Yahoo, Outlook.
- 4 **Subject Scorer**
A/B test up to 10 lines across 7 dimensions.
- 5 **BIMI Checker**
Logo + VMC cert + DMARC chain validation.
- 6 **Header Analyzer**
Raw email headers translated to plain English.
- 7 **Blacklist Monitor**
110+ blocklists watched 24/7 with alerts.
- 8 **Email Verifier**
Syntax, MX, disposable, SMTP — one address.
- 9 **Warm-up Tracker**
Daily volume log + safe-ramp thresholds.
- 10 **Framework Lab**
16 copy frameworks + AI rewrites in your tone.

RESCUE METHOD

The 6 Decay Pillars

- 1 **Real Engagement**
Calibrate the truthful baseline. Kill the Gaslighting Gap.

- 2 Decay Source Isolation**
Diagnose Domain vs. List vs. Copy vs. Offer.
- 3 Domain Rescue**
72-hour pause + 7-day rebuild ramp protocol.
- 4 List Rescue**
3-layer triage + engagement-gradient segmentation.
- 5 Copy & Offer Rescue**
3-variable isolation + pivot decision tree.
- 6 Decay-Proofing**
Weekly check + threshold triggers + monitoring.

The cross-reference

Which tool reads which Signal. Which tool serves which Pillar. One row per tool.

● Primary — the main answer ○ Secondary — supports / contributes

TOOL	S1	S2	S3	S4	S5	S6	S7	P1	P2	P3	P4	P5	P6
Email Test Real send + header report		○		○		●			○				○
Sender Check DNS auth + 62 blocklists				●		●			○	●			○
Inbox Placement Primary / Promos / Spam		●		○		○			●				○
Subject Scorer Copy Intelligence												●	
BIMI Checker Logo + VMC + DMARC chain						○				○			○
Header Analyzer				○		●			●	○			

TOOL	S1	S2	S3	S4	S5	S6	S7	P1	P2	P3	P4	P5	P6
Raw headers decoded													
Blacklist Monitor 24/7 watchdog				●			○			○			●
Email Verifier Single-address validation	●				○			○			●		○
Warm-up Tracker Daily volume log				○		○				●			○
Framework Lab Copy Intelligence												●	

Note: Signal 3 (Acquisition Quality) and Signal 7 (Decay Velocity) are read by the **Signal Engine itself** on your uploaded CSV or connected ESP — not by any standalone tool. That's the deliberate boundary between the free toolkit and Pro automation.

By Signal — which tools read it

S1 Bounce Exposure Email Verifier

S2 Engagement Trajectory Inbox Placement (+ Email Test)

S3 Acquisition Quality Signal Engine only — Pro/Agency

S4 Domain Reputation Sender Check · Blacklist Monitor (+ Header Analyzer, Warm-up, Placement)

S5 Spam Trap Exposure

Email Verifier (disposable + dormancy)

S6 Auth Standing

Sender Check · Header Analyzer · Email Test (+ BIMl, Warm-up)

S7 Decay Velocity

Blacklist Monitor (over time) — primary read is the Signal Engine

By Pillar — which tools serve it

P1 Real Engagement

Email Verifier (cleaner list = truer baseline). Actual MPP calc happens in the Signal Engine.

P2 Decay Source Isolation

Header Analyzer · Inbox Placement (+ Sender Check, Email Test)

P3 Domain Rescue

Sender Check · Warm-up Tracker (+ Blacklist Monitor, Header Analyzer, BIMl)

P4 List Rescue

Email Verifier (surface clean). The 3-layer triage lives in Signal Map.

P5 Copy & Offer Rescue

Subject Scorer · Framework Lab

P6 Decay-Proofing

Blacklist Monitor (+ scheduled Sender Check, Inbox Placement, Email Verifier, Warm-up)

See what's about to break. Before the send.

The 10 tools read the surface. The Signal Engine reads all 7. The Pillars rescue what's already broken. Start with your Signal Score — free, no signup.
